

# Home Safety Checklist for Fall Hazards

This room-by-room checklist highlights possible fall hazards. If you mark “Yes” to any of these questions, consider the suggestions to help reduce your chances of falling.

## BATHROOM

| POSSIBLE HAZARD                                                                               | YES | SUGGESTIONS                                                                                                                                         |
|-----------------------------------------------------------------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Is the path from the bedroom to the bathroom dark?                                            |     | Nightlights can be helpful in lighting the way.                                                                                                     |
| Are towel racks used to balance or grab onto while getting in or out of the bathtub/shower?   |     | Towel racks may not be mounted well enough to support a person's weight. Install grab rails in the appropriate places.                              |
| Is it difficult to stand during a shower?                                                     |     | A shower seat allows older adults to shower without getting tired of standing or risking a fall because of dizziness.                               |
| Is the shower floor and/or bathtub slippery?                                                  |     | Install non-skid strips or a non-slip mat.                                                                                                          |
| Is there any water on the floor after a bath/shower?<br>Are there leaks from the tub/ shower? |     | Patch leaks with caulk or other appropriate materials. Wipe up water immediately to prevent slipping. Use a bath mat with a slip resistant backing. |
| Is it necessary to reach far or turn around to get towels, shampoo, and soap?                 |     | A shower/bath storage unit that attaches to the side of the tub or shower wall can reduce the need to reach or turn around to get things.           |
| Is it difficult to get on and off the toilet?                                                 |     | It may be helpful to raise the seat and/or install handrails. Replace the toilet with a higher toilet and/or install                                |

# BEDROOM

| POSSIBLE HAZARD                                                                          | YES | SUGGESTIONS                                                                                                                            |
|------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------|
| Is there a long reach from the bed to a light?                                           |     | Moving the lamp closer to the bed or attaching a light to the headboard reduces the chances of falling.                                |
| Is it necessary to get out of bed or reach far to get to the telephone?                  |     | A longer phone extension cord or a cordless phone within easy reach of the bed can reduce the chances of falling.                      |
| Is it necessary to get out of bed or reach far to get eyeglasses?                        |     | Store glasses within reach of the bed.                                                                                                 |
| Are there telephone, light, or television cords running along the floor on the walkways? |     | Cords are a tripping hazard. Reroute cords so they do not cross walking paths and/or get an electrician to install additional outlets. |
| Is there clutter (clothes, shoes, books, etc.) on the floor?                             |     | Remove clutter from walkways to reduce the chances of tripping over it.                                                                |
| Is it common to get up many times during the night to use the bathroom?                  |     | Place a portable commode near the bed to eliminate nighttime trips to the bathroom.                                                    |

# KITCHEN

| POSSIBLE HAZARD                                                                                            | YES | SUGGESTIONS                                                                                                                                           |
|------------------------------------------------------------------------------------------------------------|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Are there floor mats or rugs in the kitchen?                                                               |     | Remove throw rugs or secure them to the floor with slip-resistant backing.                                                                            |
| Is it necessary to reach far, bend over, or climb on a stool to get commonly-used kitchen items and foods? |     | Rearrange cupboards and drawers so that items used most often are waist high. Use a sturdy step stool with a grab bar to reach items stored overhead. |
| Is there liquid, food, grease, or other clutter on the floor?                                              |     | Sweep often and wipe up liquid immediately to reduce the chances of slipping.                                                                         |

# LIVING AREAS

| POSSIBLE HAZARD                                                               | YES | SUGGESTIONS                                                                                                                                                                                |
|-------------------------------------------------------------------------------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Do carpets, rugs, and floor coverings have frayed corners or rolled-up edges? |     | Remove damaged floor coverings or secure them well with double-sided tape, nails, etc. It's important to have a flat, sturdy walkway.                                                      |
| Are there throw rugs in walkways?                                             |     | The best thing to do is to remove throw rugs. Put double-sided tape on them so they don't slip.                                                                                            |
| Are chairs and couches low to the ground?                                     |     | Higher chairs and armrests are helpful for easing into a sitting position.                                                                                                                 |
| Is it necessary to get up to answer the phone?                                |     | Keep a phone nearby so you don't have to get up quickly if the phone rings. Cordless phones are helpful. Keep a phone close to the floor in order to call for help in the event of a fall. |
| Do you have to walk over or around electrical cords or wires?                 |     | Tape cords and wires to the wall or have an electrician install additional outlets.                                                                                                        |
| Are there newspapers, boxes, shoes, etc. on the floor?                        |     | Remove clutter from walkways to avoid tripping.                                                                                                                                            |
| Do you need to walk around furniture to get through the living area?          |     | It's best to have a straight path, clear of furniture. Rearrange furniture to provide for obstacle-free walking.                                                                           |
| Do you have to reach up to pull cords to lights or ceiling fans?              |     | Install longer cords or link ceiling lights/fans to a light switch on the wall to eliminate the need to look and reach up.                                                                 |
