

# Detailing Single Wythe Concrete Masonry Buildings

CPG-007

This course discusses the keys to successfully designing details for single wythe concrete masonry buildings, with a focus on moisture control, energy conservation, structural performance and aesthetic opportunities.

## Program Learning Objectives:

1. Understand the challenges and successful strategies regarding moisture control in single wythe masonry construction.
2. Learn how to detail single wythe wall assemblies for maximum moisture resistance and energy conservation.
3. Understand how single wythe walls can be designed for energy efficiency.
4. Visualize aesthetic options available with single wythe architectural concrete masonry.

Upcoming CEU Webinar (*click time to follow link*)  
Wednesday 5/6 12pm CST & 12pm PST  
Thursday 5/7 12pm EST & 12pm MST
